

# Make Your Business Work

Starting your business, running your business, growing your business and perhaps eventually selling your business, present a host of daily challenges. Very few small businesses are in a position to adequately cope with these daily pressures and yet at the same time plan for eventualities which may well scupper their business.

Cash flow management, funding, writing a business plan, cost cutting, increasing profit, time management and more, all underpin a successful business. For example, a simple financial health check of your business is a quick and easy way to review and identify any potential financial issues in your business. Managing your business cash flow cycle, funding your purchases, and managing your debtors can make a big difference to your bottom line.

As your business grows so do the challenges. Recruiting, interviewing

and selecting staff, understanding pay and entitlements, taxation, leave, superannuation, workplace health and safety, training staff, workers' compensations, accessing government support schemes (a minefield in itself), all present diverse challenges. Smarter Business Services can help in all these areas. Call us NOW.
