

Nothing but the Best

"Smart Employment Solutions, recognised as a leader in employment and training since 1986, offers automotive industry employers a comprehensive range of personnel and recruitment and business services in addition to providing excellent apprentices and trainees." These are not my comments, but appear in the April 2011 issue of Motor Trader magazine.

They appear in an article announcing that apprentice Evan Sides had been selected as the Ford Apprentice of the Year for Queensland. He works for Bremer Ford. The article goes on to say that Bremer Ford obtained the services of Evan from Smart Employment Solutions in 2009. The Operations Manager at Bremer Ford was reported as saying that Bremer Ford was "blessed" to have been given the apprentice because from the beginning Evan had "shown great promise and will in time play a major part in elevating future apprentices to achieve the same goals that he has."

This sort of success is achievable for those who are prepared to show the commitment and enthusiasm in the job, as Evan has. Smart Employment Solutions plays its part by providing apprentices and employers with support, training and guidance throughout their apprenticeship. Smart Employment Solutions is proud to have placed over 12,000 apprentices in the workplace in the past 25 years.
